

The following is the Landscape Committee's Annual Report:

I am pleased to inform you that all members were able to be on the Island during the season. All members did what they could with all the regulations and limited ferry schedule. I was in contact with all members via phone, text, and/or in person. The rain garden was tended to, some paths cleared, milkweed planted, and Japanese Barberry located for removal.

Bustins Island Monarch Society (BIMS) was put on hold but hopes to be in full swing next year. The committee hopes next year to also start a special project that is paired with the Nature Center. The Committee will continue to update the Landscape Binders with pictures and information for all to refer to. Next year small shrubs, trees, flowers, and ground cover may be considered for purchase to help prevent erosion. We will work together to decide what projects to tackle when we meet in the spring/summer of 2021.

I thank all of the Committee members for their hard work in the beautification of Bustins Island.

Respectfully submitted,

Pamela L. Lavoie
Landscape Committee Chair
